1 – INTRODUCTION

Launched in 2022, **Power of Hydrogen** wants to **support** and **reward** the consumption of green hydrogen for road transports and mobility, around the world and through development of an **innovative cashback solution**.

We are represented by "\$POHYD" token on the cryptocurrency market. Our coin is running on **Binance Smart Chain (BSC)** and offers a total supply of **100,000,000 tokens**.

You can purchase "\$POHYD" token on [Pancakeswap](#).

100% of the Power of Hydrogen project is funded by our team. No fundraising has been done for now.

For any question, please contact us : contact@powerofhydrogen.net
Support 24/7 [mail](#), [instagram](#), [twitter](#) or [telegram](#).

2 – OUR PROJECT

We believe that green hydrogen will be one of the most widely used clean energies in the coming decades.

Power of Hydrogen wants to **support** development and **reward** consumption of green hydrogen, for a cleaner world. We think that is the best way to promote the many qualities of this clean energy that is still not used enough in the world.

You can find in « chapter - 8 » advantages of green hydrogen energy.

(Collected from sources dealing with green hydrogen energy)

For this, we have imagined an innovative project and cashback solution :

- Consume green hydrogen at any refueling station in the world
- Register or login on your customer account on our website
- Import your proof of payment (sales receipt)
- Your request is sent to our moderation team which checks all the information transmitted
- Be reward with our "\$POHYD" token after validation!

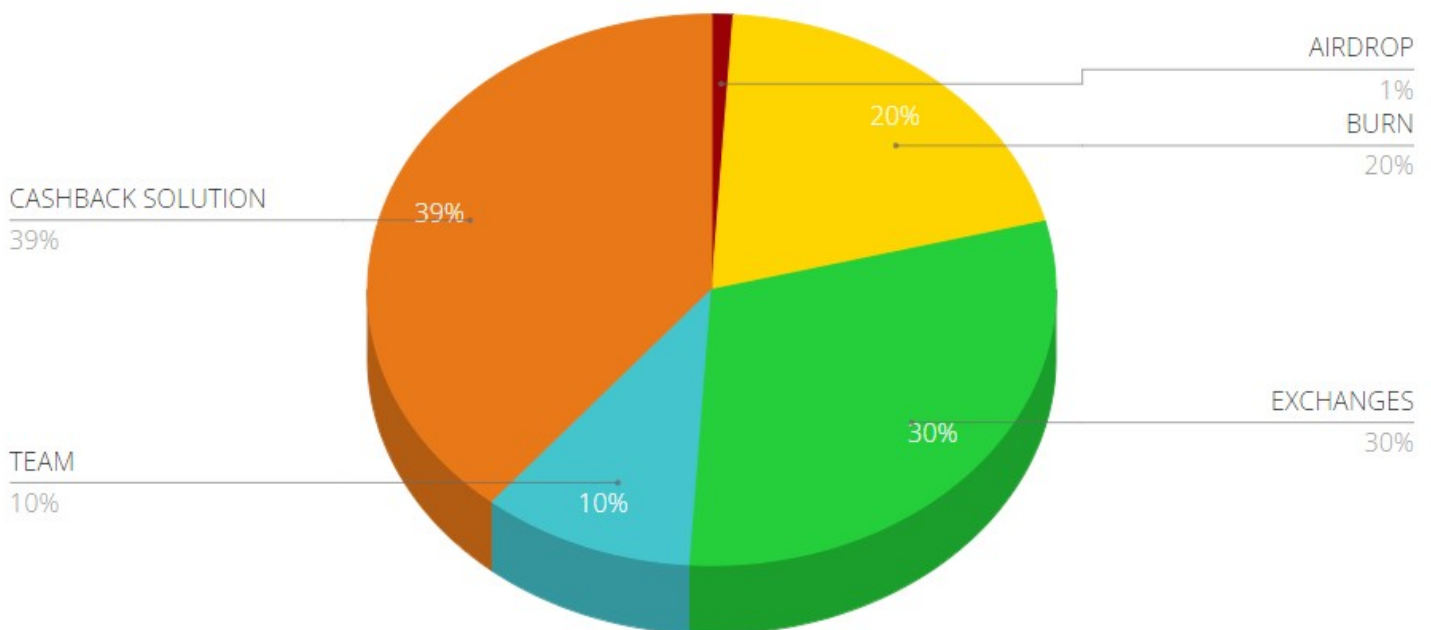

Rewards will be send directly to the customer wallet address, **for FREE!** (ex : Metamask)
*These may be **holded**, **used** on our website to subscribe to services or **sold**.*

All individuals and professionals are concerned by our solution!

Available for hydrogen cars, motorbikes and trucks.

A mobile application will be developed after the official launch of our online platform.

3 – TOKEN DISTRIBUTION

*(Screen from www.powerofhydrogen.net – 04/2022)
Forecast percentages by 01/2023*

The distribution of the tokens was established according to the needs of our project :

- 30 % allocated to exchanges (*Pancakeswap since 04/22*)
- 10 % allocated to team
- 39 % allocated to cashback solution (*scheduled for launch in late 2022 / early 2023*)
- 1 % allocated to airdrop
- 20 % allocated to burn (*no precise date at this time*)

With this distribution, **we ensure the sustainability of our project**. *Our team reserves the right to modify the token distribution for the proper functioning of the project.*

Addition of liquidity will be done step by step.
Liquidity pool deployment on Pancakeswap in progress (4%...)

Please note that each modification will be indicated on our website.

4 – ROADMAP

Roadmap 2022 / 2023 :

- ✓ **April 2022** : Launch of the "\$POHYD" cryptocurrency on the Binance Smart Chain
- ✓ **April 2022** : Launch of the official website <https://www.powerofhydrogen.net>
- ✓ **April to November 2022** : Start of listings (Coinmarketcap, Coingecko, Coinpaprika...)
- (*extension until November 2022*)
- ✓ **April to February 2023** : Marketing strategy – (*extension until February 2023*)
- ✓ **May 2022** : First airdrop of "\$POHYD" token
- ✓ **In progress** : B2B partnerships
- ✓ **November 2022** : Market research
- ✓ **End of 2023** : Start of development of our hydrogen cashback solution
- ✓ **COMING SOON** : Official **ALPHA** launching of Power of Hydrogen cashback solution
- ✓ **COMING SOON** : Official launching of Power of Hydrogen cashback solution

Roadmap key :

✓ **Done** | ✓ **In progress** | ✓ **Planned**

Please note that all progress will be notify on our official website and in our whitepaper.
→ <https://www.powerofhydrogen.net> (Roadmap section)
Roadmap will be updated each month with new infos and dates.

Regular releases will be posted on our social networks, in order to share, in all transparency, the major advances of our project.

5 – WHAT ARE BENEFITS TO OWN \$POHYD?

There are several advantages for an investor to own "\$POHYD" token:

- You will own the first cashback token for green hydrogen in the world ✓
- A team dedicated to the development of his project, sustainable for future ✓
- A token with great potential, with billions of vehicles involved by our solution ✓
- You will contribute to the development and consumption of a clean energy, green hydrogen ✓
- By owning "\$POHYD" token, you contribute to the development of our project ✓

Click [here](#) to see our entire project.

Decisions made by the Power of Hydrogen project management may be subject to a vote by investors. Each investor in possession of the "\$POHYD" token may be asked to participate in the vote.

Please note that this information will be posted on our website and emailed directly to each investor.

You too, support Power of Hydrogen and make THE choice for a tomorrow cleaner world!

6 – ALLOCATION OF INVESTMENTS

Here are the main areas where we will allocate our investments (year 2022):

- Web hosting
- Marketing / advertisement
- Cashback solution development
- Mobile application (soon)
- B2B partnerships

Power of Hydrogen will also be able to make investments and take stakes in competing cryptocurrencies for its own strategy and development.

These investments may be subject to a vote of the investors.

7 – HOW DO WE PAY OURSELVES?

Power of Hydrogen will conclude partnerships/contracts with various retailers who have green hydrogen refueling stations in the world.

Each partner will pay remuneration to our entity, in order to be eligible to our online cashback solution.

Part of the remuneration received will be directly reinvested in the development of our project and in the purchase of tokens ("\$POHYD") available on the market.

8 – GREEN HYDROGEN

Why we choosed green hydrogen for our project?

This is the best and cleaner energy, to end the use of fossil fuels. For our cars, motorbikes and trucks, we can make the choice of green hydrogen and contribute to a better world.

How is it made?

Green hydrogen is dihydrogen obtained by electrolysis of water and from renewable electricity.

There is some advantages to use this energy:

- A solution that can replace fossil fuels ✓
- Autonomy of fuel cell is better than battery ✓

- Recharging time is faster (3-5 minutes only), at any refueling station in the world ✓
- Only water vapor emissions ✓
- Safe as a traditional car, truck or motorbike ✓

«For the energy transition, we must choose a hydrogen vehicle to respect environment!» (Yannick – Co-founder of Power of Hydrogen)
